

St. Joseph's Catholic Primary School Internet Policy

This General Internet Policy has been approved and adopted by the Governing Body and will be reviewed annually.

Reviewed April 2020.

**To be reviewed annually but updated accordingly with new developments within the curriculum.
Date of next review April 2021**

Mission statement

As a Catholic School, we value the special identity that God's love has created in each of us.

The Gospel inspired values of trust, honesty, self-respect, self-discipline and forgiveness are at the heart of our everyday loving and caring for one another.

All our curriculum activity reflects these principles as we search faithfully for excellence.

Together with parents, families, the church and the community, we encourage each individual to develop their God given talents and skills and realise their unique potential.

Our Mission

Our Mission is to live in the way Jesus wanted. He told us to "Love One Another as I have loved you."

The rapid developments in electronic communications are having many effects on society. Today, every child in school is younger than the World Wide Web and they use it more than some adults. Therefore, it is important to identify what is to be achieved by the use of the Internet within school, at home, and how the Internet can be safely used.

At St Joseph's we aim to provide a high quality-learning environment where children can achieve their full potential. We see the Internet as being a valuable enhance staff development through access to educational materials, as well as the sharing of information and collaboration between schools.

Support parents to enhance learning at home.

Inappropriate Materials

There is a wealth of valuable educational sites available on the Internet, but unfortunately alongside these, are websites that contain inappropriate materials, which it would be unacceptable for the children to gain access to. To ensure that children can access the Internet safely, we use the James Montgomery Academy Trust (JMAT) (ISP). The ISP uses a filter to exclude any inappropriate material by barring access to sites listed as being inappropriate. However, there is always a small chance that inappropriate materials may be unfiltered by this system.

Therefore, we have the following guidelines for using the Internet within school Guidelines for Staff.

- Children should only use the Internet under the supervision of an adult.
- Only use the Webpages that they have been asked to access by their teacher or responsible adult.
- Inform teachers immediately if they encounter any information or Webpages that they feel are inappropriate or offensive.
- Only send polite e-mails to the address that their teacher has specified and not include any personal information (i.e. address or telephone number)

School Will:

- Inform all parents that their children will be provided with supervised Internet access as part of the school's curriculum.
- Inform all parents of the school's "Rules for Responsible Internet Use" which their children will be expected to abide by in order to ensure a safe environment.
- Answer parents' queries and concerns about their child's use of the Internet and our safeguards to protect them from unpleasant material (The school will not call for parental permission before a child is allowed to gain access to the Internet).

The School Website

The school web site provides information for parents, examples of children's work and useful links for children, parents and teachers. It is our policy only use photographs of children on the school website if we have parental consent to do so.

Social Networking Sites

As use of the Internet continues to grow, children are using it at home for social networking. Parents should be aware that if children are accessing Face Book or other such social networking sites, then they have used incorrect personal details- i.e. they have lied about their age. The school will not condone this.

Parents should not post about the school or individual children on any social networking sites. Sometimes, problems online started at home can spill into school. A Partnership approach with parents is encouraged to include parent information sessions with demonstrations and suggestions for safe home Internet use. School will inform parents if an incident from home impacts into school. School will not tolerate any form of bullying.

Parents' attention will be drawn to this policy in newsletters, the school prospectus and on the school website.
